

SHIFT

Video transcript

There has been a shift in how we think about our energy and the challenge of climate change.

The pursuit of renewables and new technologies is the way forward.

And NW Natural hasn't stood idle.

We have begun to convert waste into Renewable Natural Gas.

To help reduce emissions in the air and provide a net-zero carbon energy for the future.

With Renewable Natural Gas, we're creating a better energy by design.

NW Natural. Less we can.
